

OMNIGOLF Letter of Recommendation

As the COO of Savan Resorts, it is my pleasure to write this letter of recommendation for Qualitas Project Control (QPC). As the first OMNIGOLF Entertainment Zone facility, it was fascinating to see the project evolve from a desire for a unique and fun golf related entertainment venue for our VIP clients planning to stay in the new VIP-only addition, The Suites at Savan Resorts. I have to say Sam and his QPC team listened to our goals and came back with several great options that can also be phased in or expanded as development permits. With the concepts presented, we were able to choose the one that would offer us the most success with our customer base.

We decided on a two-story Entertainment center with ultra-high tech hitting bays, a natural turf lighted range and targets, a second floor event center that can be refined for future options, a fantastic expertly landscaped waterfall, and beautifully landscaped range that is environmentally friendly and uses only local native species. QPC has also designed a chip/putt course for our next phase of which the earthworks and irrigation has already been completed. The interior of the EZ will feature vintage bar games such as Pinball, Shuffleboard and Mini Bowling to compliment the restaurant services that further add to the overall entertainment experience.

Qualitas Project Control was contracted for the design and construction management of the golf entertainment center and amenities. The design of the project was certainly innovative and well thought out. They were extremely professional and finished on time and in budget which is challenging and rare in this region. Qualitas' interaction with the project team, manager, staff, suppliers and subcontractors was outstanding. Sam's personal attention to the project and the ability to solve unforeseen issues even before they happened was most appreciated.

We could not be happier with Qualitas' performance. The company continues to be available and cooperative even today after the initial phase is complete.

Although the opening and phase two of the project is delayed due to COVID 19, the finished product of the first phase which includes the target range, water feature, hitting bays, structure, range lighting, and landscaping is extremely beautiful and has positively impressed all those who have visited.
